Cilji in kompetence:

Študent spozna osnovne pojme iz algebri, ki jih potrebuje pri nadalnjem študiju matematike. Ob tem se uči abstraktnega načina razmišljanja in se spoznava s strogim matematičnim jezikom. Na vajah si pridobiva praktično, delovno znanje z obravnavanega področja.

Objectives and competences:

Basic notions in algebra are introduced, which are needed for the subsequent study. Abstract thinking and mathematical rigour are enhanced. Practical, working knowledge is obtained during exercise classes.

Predvideni študijski rezultati:

Znanje in razumevanje: Poznavanje in razumevanje osnovnih algebraičnih pojmov.
Uporaba: Uporaba teorije pri reševanju problemov.

Intended learning outcomes:

Knowledge and understanding: Knowledge and understanding of basic algebraic concepts.
Application: Application of the theory in solving problems.

Refleksija: Razumevanje teorije na podlagi primerov in uporabe.

Prenosljive spretnosti – niso vezane le na en predmet: Spretnost prenosa teorije v prakso.

Reflection: Understanding of the theory from the applications.

Transferable skills: Ability to transfer the theory into practice.
