<b>Nosilec predmeta / Lecturer:</b>		prof. Boris Lavrič, prof. Franc Forstnerič				
<b>Jeziki / Languages:</b>		<b>Predavanja / Lectures:</b> slovenski/Slovene, angleški/English				
		<b>Vaje / Tutorial:</b> slovenski/Slovene, angleški/English				
<b>Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:</b>				<b>Prerequisites:</b>		
<b>Vsebina:</b>				<b>Content (Syllabus outline):</b>		
Affine in konveksne množice. Topološke lastnosti konveksnih množic. Caratheodorijev in Radonov izrek. Separacijski izreki. Ekstremne točke. Politopi. Stožci in polare. Poliedri. Izrek				Affine and convex sets. Topological properties of convex sets. Theorems of Caratheodory and Radon. Separation theorems. Extreme points. Polytopes. Cones and polars. Polyhedra. The		

Weyla in Minkowskega. Sistemi linearnih neenačb. Farkaseva lema in linearno programiranje. Posplošitve Hellyjevega izreka. Metrični prostor konveksnih množic. Blaschkejev izrek. Metrične lastnosti konveksnih množic. Konveksne funkcije. Zveznost, odvedljivost in subgradient. Ekstremi.	theorem of Weyl and Minkowski. Systems of linear inequations. The Farkas lemma and linear programming. Generalizations of the theorem of Helly. The metric space of convex sets. The Blaschke theorem. Metric properties of convex sets. Convex functions. Continuity, differentiability and the subgradient. Extrema.
--	--

### Temeljni literatura in viri / Readings:

<p>H. G. Eggleston: Convexity, Cambridge Univ. Press, Cambridge, 1958.</p> <p>A. Brøndsted: An Introduction to Convex Polytopes, Springer, New York-Berlin, 1983.</p> <p>F. A. Valentine: Convex Sets, Robert E. Krieger, Huntington, 1976.</p> <p>R. T. Rockafellar: Convex Analysis, Princeton Univ. Press, Princeton, 1996.</p> <p>A. W. Roberts, D. E. Varberg: Convex Functions, Academic Press, New York-London, 1973.</p>
--

### Cilji in kompetence:

Študent spozna osnovne pojme konveksne geometrije in konveksne analize. Seznan se z lastnostmi konveksnih množic in konveksnih funkcij v evklidskih in normiranih prostorih ter z uporabo teorije na raznih področjih matematike. Pri tem povezuje geometrijsko intuicijo z algebro, analizo in kombinatoriko.
--

### Objectives and competences:

The student learns the basic concepts of convex geometry and convex analysis. The student gets familiar with the properties of convex sets and convex functions in euclidean and normed spaces and applications of the theory in different areas of mathematics. The student combines geometric intuition with algebra, analysis and combinatorics.
---

### Predvideni študijski rezultati:

<p>Znanje in razumevanje: Poznavanje in razumevanje osnovnih pojmov teorije konveksnih množic in konveksnih funkcij. Sinteza metod iz linearne algebre, analize in geometrije.</p> <p>Uporaba:</p> <p>Uporaba teorije pri reševanju problemov na raznih področjih matematike in drugih znanosti.</p>
--

### Intended learning outcomes:

<p>Knowledge and understanding: Knowledge and understanding of basic concepts of the theory of convex sets and convex functions. A synthesis of methods of linear algebra, analysis and geometry.</p> <p>Application:</p> <p>Solving problems in different areas of mathematics and other sciences using the theory.</p>
--

<p><b>Refleksija:</b></p> <p>Razumevanje teorije na podlagi primerov in uporabe.</p> <p>Prenosljive spretnosti – niso vezane le na en predmet:</p> <p>Postavitev problema, njegova matematična formulacija ter reševanje in analiza. Prenos teorije v prakso.</p>	<p><b>Reflection:</b></p> <p>Understanding the theory on the basis of examples and applications.</p> <p>Transferable skills:</p> <p>Posing of a problem, its mathematical formulation, solving and analysis. The transfer of the theory into praxis.</p>
---	--

<p><b>Metode poučevanja in učenja:</b></p> <p>predavanja, vaje, domače naloge, konzultacije</p>	<p><b>Learning and teaching methods:</b></p> <p>Lectures, exercises, homeworks, consultations</p>
---	---

<b>Načini ocenjevanja:</b>	Delež (v %) / Weight (in %)	<b>Assessment:</b>
<p>Način (pisni izpit, ustno izpraševanje, naloge, projekt): izpit iz vaj (2 kolokvija ali pisni izpit)</p> <p>ustni izpit</p> <p>Ocene: 1-5 (negativno), 6-10 (pozitivno) (po Statutu UL)</p>	<p>50%</p> <p>50%</p>	<p>Type (examination, oral, coursework, project): 2 midterm exams instead of written exam, written exam</p> <p>oral exam</p> <p>Grading: 1-5 (fail), 6-10 (pass) (according to the Statute of UL)</p>
