

UČNI NAČRT PREDMETA / COURSE SYLLABUS						
Predmet:		Liejeve grupe				
Course title:		Lie groups				
Študijski program in stopnja Study programme and level		Študijska smer Study field		Letnik Academic year	Semester Semester	
Magistrski študijski program Finančna matematika		ni smeri		1 ali 2	prvi ali drugi	
Master's study programme Financial Mathematics		none		1 or 2	first or second	
Vrsta predmeta / Course type				izbirni		
Univerzitetna koda predmeta / University course code:				M2313		
Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS
45		30			105	6
Nosilec predmeta / Lecturer:				prof. Franc Forstnerič, prof. Janez Mrčun, prof. Pavle Saksida		
Jeziki / Languages:		Predavanja / Lectures: slovenski/Slovene, angleški/English				
		Vaje / Tutorial: slovenski/Slovene, angleški/English				
Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:				Prerequisites:		
Vsebina:				Content (Syllabus outline):		
Liejeva grupa in njena Liejeva algebra. Eksponentna preslikava. Adjungirano delovanje.				Lie group and the associated Lie algebra. Exponential map. Adjoint action. Lie theory.		

<p>Liejeva teorija.</p> <p>Homogeni prostori. Izrek o rezini.</p> <p>Kompaktne Liejeve grupe. Haarova mera. Maksimalni torusi.</p> <p>Možne dodatne vsebine:</p> <p>Weylova grupa. Korenski prostori. Upodobitve kompaktnih Liejevih grup. Rešljive, nilpotentne in polenostavne Liejeve grupe in Liejeve algebre. Harmonična analiza na Liejevi grupi.</p>	<p>Homogeneous spaces. Slice theorem.</p> <p>Compact Lie groups. Haar measure. Maximal tori.</p> <p>Other possible topics::</p> <p>Weyl group. Root spaces. Representations of compact Lie groups. Solvable, nilpotent and semisimple Lie groups and Lie algebras. Harmonic analysis on a Lie group.</p>
---	--

Temeljni literatura in viri / Readings:

<p>J. F. Adams: Lectures on Lie Groups, W. A. Benjamin, New York-Amsterdam, 1969.</p> <p>F. W. Warner: Foundations of Differentiable Manifolds and Lie Groups, Springer, New York-Berlin, 1983.</p> <p>J. P. Serre: Lie Algebras and Lie Groups, 2nd edition, Springer, Berlin, 2006.</p> <p>T. Bröcker, T. T. Dieck: Representations of Compact Lie Groups, Springer, New York, 2003.</p> <p>•J. J. Duistermaat, J. A. C. Kolk: Lie Groups, Springer, Berlin, 2000.</p>
--

Cilji in kompetence:

<p>Študent se spozna s pojmom Liejeve grupe in njene Liejeve algebre, ter z Liejevo teorijo. Posebej se seznanj s teorijo upodobitev kompaktnih Liejevih grup in homogenih prostorov. Liejeve grupe so centralni pojem diferencialne geometrije, njihova uporaba pa sega v številna področja matematike in matematične fizike.</p>
--

Objectives and competences:

<p>Student gets familiar with the basic concepts of Lie group with the associated Lie algebra, and with Lie theory. In particular, the student learns the basic theory of representations of compact Lie groups and homogeneous spaces. Lie groups are a central concept of differential geometry and are applied in many areas of mathematics and mathematical physics.</p>
--

Predvideni študijski rezultati:

<p>Znanje in razumevanje: Poznavanje in razumevanje osnovnih pojmov in definicij iz teorije Liejevih grup.</p> <p>Uporaba: Uporaba teorije pri reševanju problemov.</p> <p>Refleksija: Razumevanje teorije na podlagi</p>

Intended learning outcomes:

<p>Knowledge and understanding: Knowledge and understanding of basic concepts and definitions of the theory of Lie groups.</p> <p>Application: Solving problems using the theory.</p>

uporabe.

Prenosljive spretnosti – niso vezane le na en predmet: Spretnosti uporabe domače in tuje literature in drugih virov, identifikacija in reševanje problemov, kritična analiza.

Reflection: Understanding of the theory from the applications.

Transferable skills: Skills in using the literature and other sources, the ability to identify and solve the problem, critical analysis.

Metode poučevanja in učenja:

predavanja, vaje, domače naloge, konzultacije

Learning and teaching methods:

lectures, exercises, homeworks, consultations

Delež (v %) /

Načini ocenjevanja:

Weight (in %)

Assessment:

<p>Način (pisni izpit, ustno izpraševanje, naloge, projekt): 2 kolokvija namesto pisnega izpita, pisni izpit ali domače naloge</p> <p>ustni izpit</p> <p>Ocene: 1-5 (negativno), 6-10 (pozitivno) (po Statutu UL)</p>	<p>50%</p> <p>50%</p>	<p>Type (examination, oral, coursework, project): 2 midterm exams instead of written exam, written exam or homework</p> <p>oral exam</p> <p>Grading: 1-5 (fail), 6-10 (pass) (according to the Statute of UL)</p>
