- J. M. Steele: Stochastic Calculus and Financial Applications, Springer, New York, 2001.

Cilji in kompetence:

Predmet predstavlja uvod v teorijo slučajnih procesov v zveznem času z zveznimi trajektorijami. Rigorozno obravnava Brownovo gibanje kot osnovni primer in gradnik, vpelje martingale v zveznem času, Itôv stohastični račun in Itovo formulo.

Objectives and competences:

This course is an introduction to the theory of stochastic processes in continuous time with continuous sample paths. It rigorously treats Brownian motion as a basic example and building block, introduces martingales in continuous time, stochastic calculus and Ito's formula.

Predvideni študijski rezultati:

Znanje in razumevanje: Matematična orodja za

Intended learning outcomes:

Knowledge and understanding:

<p>stogo obravnavo in uporabo slučajnih procesov.</p> <p>Uporaba:</p> <p>Osnova za modeliranje v mnogih vejah matematike in njene uporabe.</p> <p>Refleksija:</p> <p>Vsebina predmeta pomaga za nazaj poglobiti razumevanje konceptov verjetnosti, koncepta odvisnosti in časa.</p> <p>Prenosljive spretnosti – niso vezane le na en predmet:</p> <p>Spretnosti so prenosljive na druga področja matematičnega modeliranja, še najbolj pa je predmet pomemben zaradi svoje neposredne uporabnosti pri finančnem modeliranju.</p>	<p>Mathematical tools for rigorous treatment and applications of stochastic processes.</p> <p>Application:</p> <p>Basic tools for modelling in many branches of Mathematics and its applications.</p> <p>Reflection:</p> <p>The contents of the course help in retrospect to deepen the understanding of the concepts of probability, dependence and time.</p> <p>Transferable skills:</p> <p>The skills acquired are transferable to other areas of mathematical modelling, in particular it is immediately applicable to financial models.</p>
