

UČNI NAČRT PREDMETA / COURSE SYLLABUS							
Predmet:		Finančna matematika 3					
Course title:		Financial mathematics 3					
Študijski program in stopnja Study programme and level		Študijska smer Study field			Letnik Academic year		Semester Semester
Magistrski študijski program Finančna matematika		ni smeri			1 ali 2		prvi ali drugi
Master's study programme Financial Mathematics		none			1 or 2		first or second
Vrsta predmeta / Course type					izbirni		
Univerzitetna koda predmeta / University course code:					M2517		
Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS	
30	15	30			105	6	
Nosilec predmeta / Lecturer:		prof. Tomaž Košir					
Jeziki / Languages:		Predavanja / Lectures: slovenski/Slovene, angleški/English					
		Vaje / Tutorial: slovenski/Slovene, angleški/English					
Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:				Prerequisites:			
Vsebina:				Content (Syllabus outline):			

<p>Osnove: obrestne mere, krivulje donosov, struktura obveznic, LIBOR obrestne mere.</p> <p>Nekaj elementarnih modelov, kratkoročni modeli, pojem arbitraže v teh modelih, Vasičkov model, model Cox-Ingersoll-Ros, model Hull-White.</p> <p>Modeli terminskih obrestnih mer v modelih z diskretnim in z zveznim časom. Klasični modeli, teorija Heatha. Jarrowa in Mortona (HJM), modeli terminskih obrestnih mer, ki jih ženejo slučajna polja.</p> <p>Kriterij neobstoja arbitraže in pogoji usmeritve, zamenjava numerarja, martingalske metode.</p> <p>Posebne teme: LIBOR modeli, obveznice in možnost propada, problemi vrednotenja izvedenih instrumentov na obrestne mere.</p> <p>Statistična vprašanja v modelih obrestnih mer: metode za kalibracijo modelov, ocenjevanje parametrov.</p>	<p>Basic notions: interest rates, yield curves, bond structures, LIBOR rates.</p> <p>Some elementary models, short rate models, no-arbitrage in short rate models, Vasicek, Cox-Ingersoll-Ross, Hull-White models.</p> <p>Forward interest rate models in discrete and continuous time settings. Classical cases, Heath-Jarrow-Morton (HJM) framework and forward rate models driven by random fields.</p> <p>No arbitrage criteria and drift conditions, change of numeraire, martingale methods.</p> <p>Some special topics: LIBOR models, defaultable bonds, pricing problems of certain interest rate derivatives.</p> <p>Statistical questions in interest rate models, calibration methods, parameter estimation.</p>

Cilji in kompetence:

Objectives and competences:

Predmet pokriva poglavja iz matematičnih financ, ki so pomembna za modeliranje krivulj obrestnih mer.

Zaradi nepostredne uporabnosti vsebin bodo pri predmetu sodelovali tudi strokovnjaki iz prakse.

The course covers the chapter of mathematical finance that deal with modelling of the interest rate curves.

Since the content is of great practical importance we expect that also specialists from financial practice will present their work experience during the course.

Predvideni študijski rezultati:

Znanje in razumevanje:

Razumevanje matematičnih modelov, ki se uporabljajo v matematičnih financah, in sredstev za njihovo obravnavo.

Uporaba:

Pridobljeno znanje je po eni strani neposredno prenosljivo, po drugi strani pa je izhodišče za kombiniranje matematičnega znanja s finančnimi vsebinami.

Refleksija:

Področje, in s tem posledično predmet, združuje številne znanja iz matematike, predvsem tistih povezanih s teorijo verjetnosti in matematično statistiko.

Prenosljive spretnosti – niso vezane le na en predmet:

Pridobljeno znanje je neposredno uporabno v finančnih ustanovah kot so banke in investicijske družbe.

Intended learning outcomes:

Knowledge and understanding:

Understanding of mathematical models used in finance. Mathematical tools necessary in modelling.

Application:

The knowledge is directly usable in practice, it is also the source for combining of mathematical theories with finance.

Reflection:

The subject connects many mathematical topics, specially those of probability theory and statistics, with application.

Transferable skills:

The knowledge is directly applicable in everyday practice in financial institutions such as banks and investment companies.

Metode poučevanja in učenja:

Learning and teaching methods:

predavanja, vaje, domače naloge, konzultacije, seminarske naloge

Lectures, exercises, homeworks, consultations, seminars

Delež (v %) /

Načini ocenjevanja:

Weight (in %) **Assessment:**

Način (pisni izpit, ustno izpraševanje, naloge, projekt): samostojna seminarska naloga		Type (examination, oral, coursework, project): seminar work
ustni izpit		oral exam
Ocene: 1-5 (negativno), 6-10 (pozitivno) (po Statutu UL)	50% 50%	Grading: 1-5 (fail), 6-10 (pass) (according to the Statute of UL)
