Nosilec predmeta / Lecturer:		Damjan Vavpotič					
Jeziki / Languages:		Predavanja / Lectures:		slovenski/Slovene, angleški/English			
		Vaje / Tutorial:		slovenski/Slovene, angleški/English			
Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:				Prerequisites:			
Vsebina:				Content (Syllabus outline):			
Predavanja:				Lectures: The contents adapts to current trends in			

<p>Vsebina predmeta se prilagaja trenutno aktualnim trendom na področju razvoja programske opreme. Trenutno je prilagojena obravnavi agilnih metod in empiričnemu ovrednotenju njihove učinkovitosti:</p> <ol style="list-style-type: none"> 1. Pregled značilnosti agilnih metod za razvoj programske opreme 2. Vodenje agilnih projektov razvoja programske opreme <p>iterativen in inkrementalen razvoj</p> <p>metoda Scrum</p> <ol style="list-style-type: none"> 3. Tipične prakse ekstremnega programiranja <p>Programiranje v parih</p> <p>Testno voden razvoj programske opreme</p> <p>Sprotno preoblikovanje kode (refactoring)</p> <p>Orodja za podporo testno vodenemu razvoju in preoblikovanju kode</p> <ol style="list-style-type: none"> 4. Pomanjkljivosti ekstremnega programiranja 5. Kanban in vitek razvoj programske opreme 6. Metrike v programski opremi in merjenje učinkovitosti razvojnega procesa 7. Študija primera: empirično ovrednotenje posameznih praks iz točk 2 in 3 8. Primerjava agilnega pristopa z modeli za discipliniran razvoj programske opreme (Personal Software Process, Team Software Process, Capability Maturity Model) <p>Vaje:</p> <p>Namen vaj je dvojen:</p>	<p>software development. At the moment the focus is on agile methods for software development and empirical evaluation of these methods:</p> <ol style="list-style-type: none"> 1. Overview of agile methods for software development and their characteristics 2. Agile software project management <p>Iterative and incremental development</p> <p>Scrum</p> <ol style="list-style-type: none"> 3. Typical Extreme Programming practices <p>Pair programming</p> <p>Test driven development (TDD)</p> <p>Refactoring</p> <p>Software tools that support TDD and refactoring</p> <ol style="list-style-type: none"> 4. Weaknesses of Extreme Programming 5. Kanban and lean software development 6. Metrics in Software Engineering and measuring the effectiveness of the software development process 7. Case study: Empirical evaluation of the aforementioned practices 8. Comparison of agile approach to traditional disciplined software development processes (Personal Software Process, Team Software Process, Capability Maturity Model) <p>Lab practice:</p> <p>The purpose of lab practice is twofold:</p> <ol style="list-style-type: none"> 1. to acquaint students with modern software
---	---

<p>1. seznanjanje s sodobnimi orodji za razvoj programske opreme,</p> <p>2. empirično ovrednotenje posameznih pristopov k razvoju programske opreme na podlagi praktičnega dela na projektih, ki so čim bolj podobni realnim.</p> <p>Delo izven kontaktnih ur:</p> <p>Študenti razvijajo programe, ki so sestavni del projekta, ki služi kot osnova za študijo primera.</p>	<p>development tools,</p> <p>2. to empirically evaluate different approaches to software development through practical work on (almost) real software projects.</p> <p>Individual work outside of contact hours:</p> <p>Students develop programs that are part of the project that serves as a case study.</p>

Cilji in kompetence:

<p>Cilj predmeta je poglobljena obravnava sodobnih (trenutno aktualnih) metod razvoja programske opreme v primerjavi z že uveljavljenimi pristopi. Študenti delajo na obsežnejšem projektu, ki služi kot študija primera za ovrednotenje novih pristopov, da bi ugotovili njihove prednosti in pomanjkljivosti.</p> <p>Predvidene kompetence:</p> <p>sposobnost opredelitve, razumevanja in</p>

Objectives and competences:

<p>In depth treatment and empirical evaluation of modern software development methods in comparison to traditional approach. Students work on a project that serves as a case study for evaluation of modern approaches in order to find their strengths and weaknesses.</p> <p>The competences students gain are:</p> <p>the ability to define, understand and solve creative professional challenges in computer</p>
--

reševanja kreativnih strokovnih izzivov na področju računalništva in informatike,

spodobnost uporabe pridobljenega znanja pri samostojnem delu za reševanje tehničnih in znanstvenih problemov na področju računalništva in informatike, sposobnost nadgradnje pridobljenega znanja,

spodobnost skupinskega dela v profesionalnem delovnem okolju, vodenje manjše strokovne skupine,

spodobnost administrativnega vodenja procesov, povezanih z raziskovanjem, industrijo, izobraževanjem in drugimi področji,

spodobnost razumevanja in uporabe znanja računalništva in informatike na drugih tehničnih in relevantnih področjih (ekonomija, organizacijske vede ipd.),

praktično znanje in spretnosti, potrebne za uspešno strokovno delo na področju računalništva in informatike,

samostojno reševanje zahtevnih razvojnih, inženirskih in organizacijskih nalog kot tudi povprečno zahtevnih raziskovalnih nalog na področju računalništva in informatike.

and information science,

the ability to apply acquired knowledge in independent work for solving technical and scientific problems in computer and information science, the ability to upgrade acquired knowledge.

the ability of teamwork within the professional environment, management of a small professional team,

the ability for administrative management of processes related to research, industry, education and other fields,

the ability to understand and apply computer and information science knowledge to other technical and relevant fields (economics, organisational science, etc),

practical knowledge and skills of computer hardware, software and information technology necessary for successful professional work in computer and information science,

independently tackle demanding developmental, engineering, and organisational tasks as well as moderately demanding research tasks in their fields of study.

Predvideni študijski rezultati:

Po uspešnem zaključku tega predmeta bo študent zmožen:

poznati in razumeti sodobne pristope k razvoju programske opreme

razumeti ključne prednosti sodobnih metod razvoja programske opreme (v primerjavi z že uveljavljenim tradicionalnim pristopom)

uporabljati orodja, ki podpirajo sodobne metode razvoja programske opreme

uporabiti sodobne metode razvoja programske

Intended learning outcomes:

After the completion of the course a student will be able to:

know and understand modern approaches to software development

understand key benefits of modern software development methods (in comparison to traditional software development)

use tools that support modern software development methods

apply modern software development methods

<p>opreme pri razvoju dejanskih softverskih projektov</p> <p>empirično ovrednotiti rezultate novih metod</p> <p>bolje razumeti različne faktorje in okoliščine, ki vplivajo na uspešnost softverskih projektov</p> <p>izboljšati sposobnosti za skupinsko delo, vodenje, načrtovanje in organizacijo, medsebojno komuniciranje, pisno in ustno poročanje.</p>	<p>in the context of a real software development project</p> <p>empirically evaluate the outcomes of new methods</p> <p>increase understanding of different factors and circumstances that affect the success of a software development project</p> <p>increase professional skills like team-work, management, planning and organization, written and oral communication</p>
---	---

Metode poučevanja in učenja:

Predavanja z aktivno udeležbo študentov (razlaga, diskusija, primeri, reševanje problemov). Laboratorijske vaje s praktičnim delom na večjem projektu, ki služi kot študija primera za ovrednotenje posameznih pristopov k razvoju programske opreme.

Learning and teaching methods:

Lectures with active participation on the part of students (discussion, examples, problem solving). Lab practice requires practical work on an almost real project that serves as a case study for evaluation of different approaches to software development.

Delež (v %) /

Načini ocenjevanja:

Weight (in %)

Assessment:

<p>Način (pisni izpit, ustno izpraševanje, naloge, projekt):</p> <p>Sprotno preverjanje (domače naloge, kolokviji in projektno delo)</p> <p>Končno preverjanje (pisni in ustni izpit)</p> <p>Ocene: 6-10 pozitivno, 5 negativno</p> <p>(v skladu s Statutom UL).</p>	<p>50%</p> <p>50%</p>	<p>Type (examination, oral, coursework, project):</p> <p>Continuing (homework, midterm exams, project work)</p> <p>Final (written and oral exam)</p> <p>Grading: 6-10 pass, 5 fail (according to the rules of University of Ljubljana).</p>
