Cilji in kompetence:

Študent poglobi in razširi znanje teorije grafov. Spozna uporabnost grafov in omrežij na različnih področjih matematike (kombinatorika, linearna algebra, teorija grup, delno urejene množice ...) ter možnosti za njihovo uporabo tudi v drugih vejah znanosti.

Objectives and competences:

Students deepen and expand the knowledge of graph theory. They learn applicability of graphs and networks in different fields of mathematics (combinatorics, linear algebra, group theory, partially ordered sets...) and possibilities for their applications in other fields of science.

Predvideni študijski rezultati:

Znanje in razumevanje:
Študent natančneje spozna izbrana področja teorije grafov. Seznan se z najnovejšimi rezultati tega področja in z njegovimi uporabami v matematiki in drugih področjih znanosti.

Intended learning outcomes:

Knowledge and understanding:
Students get acquainted in detail with the selected topics from graph theory. They learn about the latest results in the field and its applications in mathematics and other fields of science.

Metode poučevanja in učenja:

Predavanja, vaje, domače naloge, konzultacije, projekti.

Learning and teaching methods:

Lectures, exercises, homework, consultations, projects.

Načini ocenjevanja:

Način (pisni izpit, ustno izpraševanje, naloge, projekt):
Sprotno preverjanje (domače naloge, kolokviji in projektno delo)
Končno preverjanje (pisni in ustni izpit)
Ocene: 6-10 pozitivno, 1-5 negativno
(v skladu s Statutom UL)

Weight (in %)

50%
50%**Assessment:**

Type (examination, oral, coursework, project): Continuing (homework, midterm exams, project work) Final (written and oral exam)
Grading: 6-10 pass, 1-5 fail (according to the rules of University of Ljubljana)
