

UČNI NAČRT PREDMETA / COURSE SYLLABUS (leto / year 2016/17)						
Predmet:		Izbrana poglavja iz računalniške matematike				
Course title:		Topics in mathematical foundations of computer science				
Študijski program in stopnja Study programme and level		Študijska smer Study field		Letnik Academic year	Semester Semester	
Magistrski študijski program Matematika		ni smeri		1 ali 2	prvi ali drugi	
Master's study programme Mathematics		none		1 or 2	first or second	
Vrsta predmeta / Course type				izbirni / elective		
Univerzitetna koda predmeta / University course code:				M2609		
Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS
30	15	30			105	6
Nosilec predmeta / Lecturer:		prof. dr. Andrej Bauer, prof. dr. Sergio Cabello Justo, prof. dr. Marko Petkovšek				
Jeziki / Languages:		Predavanja / Lectures: slovenski / Slovene, angleški / English				
		Vaje / Tutorial: slovenski / Slovene, angleški / English				
Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:				Prerequisites:		
Vpis v letnik študija.				Enrolment in the programme.		
Vsebina:				Content (Syllabus outline):		

<p>Predavatelj izbere nekatere pomembne teme s področja računalniške matematike, kot so na primer:</p> <p>Računska geometrija in geometrijska optimizacija.</p> <p>Računska topologija.</p> <p>Algoritmi na grafih.</p> <p>Vizualizacija grafov in podatkov.</p> <p>Računalniška grafika.</p> <p>Računalniški vid.</p> <p>Matroidi.</p> <p>Algoritmična teorija iger.</p> <p>Aproksimacijski algoritmi.</p> <p>Vzporedni algoritmi.</p> <p>Algoritmi za tokove podatkov.</p> <p>Simbolno računanje.</p> <p>Bioinformatika.</p>	<p>The lecturer selects some important topics in computational mathematics, such as:</p> <p>Computational geometry and geometric optimization.</p> <p>Computational topology.</p> <p>Graph algorithms.</p> <p>Graph and data visualization.</p> <p>Computer graphics.</p> <p>Computer vision.</p> <p>Matroids.</p> <p>Algorithmic game theory.</p> <p>Approximation algorithms.</p> <p>Parallel algorithms.</p> <p>Algorithms for data streams.</p> <p>Symbolic computation.</p> <p>Bioinformatics.</p>

Znanstveni članki.

Cilji in kompetence:

Študent spozna osnove nekaterih pomembnih področij računalniške matematike.

Objectives and competences:

The students get acquainted with some important and actual areas of computational mathematics.

Predvideni študijski rezultati:

Znanje in razumevanje: Slušatelj se natančneje seznanj z izbranim področjem računalniške matematike. Spozna teoretične osnove ter praktične prijeme z izbranega področja. Uporaba Reševanje računalniških problemov iz različnih področij.

Refleksija: Študentje spoznajo računalniške probleme in modeliranje. Povezanost med teorijo in prakso.

Intended learning outcomes:

Knowledge and understanding: Students gain deeper knowledge of selected areas in computational mathematics. They become familiar with both the theoretical foundations and the techniques for solving problems in these areas. Application: Solving computational problems from different areas. Reflection: The students see computational problems and modelling. Connection between theory and praxis. Transferable skills: Use of algorithmic thinking for solving imperfectly defined

Prenosljive spretnosti – niso vezane le na en predmet: Uporaba algoritmičnega mišljenja pri reševanju nepopolno definiranih problemov

problems.

Metode poučevanja in učenja:

predavanja, seminar, vaje, domače naloge, konzultacije in samostojno delo študentov

Learning and teaching methods:

Lectures, seminar, exercises, homework, consultations and independent work by the students

Načini ocenjevanja:

Delež (v %) /

Weight (in %)

Assessment:

Način:izpit iz vaj (2 kolokvija ali pisni izpit) or homework ustni izpit
Ocene: 1-5 (negativno), 6-10 (pozitivno) (po Statutu UL)

50%

50%

Type:
exam of exercises (2 midterm exams or written exam) or homework
oral exam.
Grading: 1-5 (fail), 6-10 (pass) (according to the Statute of UL)
