

UČNI NAČRT PREDMETA / COURSE SYLLABUS (leto / year 2016/17)						
<b>Predmet:</b>		Teorija grafov				
<b>Course title:</b>		Graph theory				
<b>Študijski program in stopnja</b>		<b>Študijska smer</b>		<b>Letnik</b>		<b>Semester</b>
Study programme and level		Study field		Academic year		Semester
Magistrski študijski program Matematika		ni smeri		1 ali 2		prvi ali drugi
Master's study programme Mathematics		none		1 or 2		first or second
<b>Vrsta predmeta / Course type</b>				izbirni temeljni / core elective		
<b>Univerzitetna koda predmeta / University course code:</b>				M2213		
<b>Predavanja</b>	<b>Seminar</b>	<b>Vaje</b>	<b>Klinične vaje</b>	<b>Druge oblike</b>	<b>Samost. delo</b>	<b>ECTS</b>
Lectures	Seminar	Tutorial	work	študija	Individ. work	
45		30			105	6
<b>Nosilec predmeta / Lecturer:</b>		prof. dr. Sandi Klavžar, prof. dr. Primož Potočnik, prof. dr. Riste Škrekovski, doc. dr. Arjana Žitnik				
<b>Jeziki / Languages:</b>		<b>Predavanja / Lectures:</b> slovenski / Slovene, angleški / English				
		<b>Vaje / Tutorial:</b> slovenski / Slovene, angleški / English				
<b>Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:</b>				<b>Prerequisites:</b>		
Vpis v letnik študija.				Enrolment in the programme.		
<b>Vsebina:</b>				<b>Content (Syllabus outline):</b>		

<p>Prirejanja in faktorji (min-max izreki, neodvisne množice in pokritja, Tuttov izrek o 1-faktorju)</p> <p>Povezanost (struktura 2-povezanih in k-povezanih grafov, dokaz in uporabe Mengerjevih izrekov)</p> <p>Barvanja grafov (meje, dokaz Brooksovega izreka, struktura k-kromatičnih grafov, Turanov izrek, kromatični polinom, tetivni grafi)</p> <p>Ravninski grafi (dualni graf, izrek Kuratowskega, konveksne vložitve, barvanja ravninskih grafov, prekrizno število)</p> <p>Predavatelj izbere še eno izmed naslednjih tem: barvanja povezav in graf povezav, hamiltonski grafi, popolni grafi, ekstremalni problemi, dominacija v grafih, simetrijske lastnosti grafov II.</p>	<p>Matchings and factors (min-max theorem, independent sets and coverings, Tutte's 1-factor theorem)</p> <p>Graph connectivity (structure of 2-connected and k-connected graphs, Menger theorem and its applications)</p> <p>Graph colorings (bounds of the chromatic number, structure of k-chromatic graphs, Turan's theorem, chromatical polynomial, chordal graphs)</p> <p>Planar graphs (dual graph, Kuratowski's theorem, convex embedding, colorings of planar graphs, crossing number)</p> <p>Instructor chooses an addition topic from the following list: edge colorings and line graphs, Hamiltonian graphs, perfect graphs, extremal graph problems, graph domination, symmetry properties of graphs II.</p>
---	--

**Temeljni literatura in viri / Readings:**

<p>R. Diestel: Graph Theory, 3. izdaja, Springer, Berlin, 2005.</p> <p>A. Bondy, U.S.R. Murty: Graph Theory, 2. izdaja, Springer, Berlin, 2008.</p> <p>D. West: Introduction to Graph Theory, 2. izdaja, Prentice Hall, Upper Saddle River, 2005.</p> <p>R. J. Wilson, M. Watkins: Uvod v teorijo grafov, DMFA Slovenije, Ljubljana, 1997.</p>
--

**Cilji in kompetence:**

<p>Študent poglobi in razširi znanje teorije grafov. Spozna uporabnost grafov in omrežij na različnih področjih matematike ter možnosti za njihovo uporabo tudi v drugih vejah znanosti.</p>
--

**Objectives and competences:**

<p>Students will deepen and broaden their knowledge of graph theory, and learn about the usefulness of graphs and networks in different areas of mathematics and their potential use in other branches of science.</p>
--

**Predvideni študijski rezultati:**

**Intended learning outcomes:**

Znanje in razumevanje: Slušatelj poglobi znanje iz teorije grafov.

Uporaba: Grafi omogočajo matematično modeliranje različnih pojavov. Slušatelj se seznani z vrsto matematičnih rezultatov, ki opisujejo lastnosti grafov in tako omogočajo matematično analizo modelov, opisanih z grafi.

Refleksija: Povezovanje teoretičnih spoznanj s praktičnimi uporabami na primer v optimizaciji in pri programiranju. Sposobnost prepoznavanja problemov, ki jih lahko uspešno opišemo z grafi.

Prenosljive spretnosti – niso vezane le na en predmet: Sposobnost opisa problemov iz vsakdanjega življenja s pomočjo matematičnih struktur, še posebej z grafi. Sposobnost uporabe matematičnih orodij za reševanje problemov.

Knowledge and understanding:  
Students deepen their knowledge of graph theory.

Application:  
Graphs allow mathematical modeling of variety of phenomena. Students learn various mathematical results that describe properties of graphs and thus provide a mathematical analysis of the models described by graphs.

Reflection:  
Integration of theoretical knowledge with practical applications such as optimization and programming. Ability to recognize problems that can be successfully described by graphs.

Transferable skills:  
The ability to describe practical problems with the help of mathematical structures, in particular with graphs. The ability to use mathematical tools to solve problems.

**Metode poučevanja in učenja:**

predavanja, vaje, domače naloge, konzultacije

**Learning and teaching methods:**

lectures, exercises, homeworks, consultations

**Načini ocenjevanja:**

Delež (v %) /

Weight (in %)

**Assessment:**

Način (pisni izpit, ustno izpraševanje, naloge, projekt):

50%

Type (examination, oral, coursework, project):

izpit iz vaj (pisni izpit)

50%

written exam

ustni izpit

oral exam

Ocene: 1-5 (negativno), 6-10 (pozitivno) (po Statutu UL)

Grading: 1-5 (fail), 6-10 (pass) (according to the Statute of UL)
