

UČNI NAČRT PREDMETA / COURSE SYLLABUS											
Predmet:	Izbrana poglavja iz didaktike matematike										
Course title:	Topics in didactics of mathematics										
Študijski program in stopnja Study programme and level	Študijska smer Study field		Letnik Academic year	Semester Semester							
3MaFi	Matematika		1 ali 2	prvi ali drugi							
3MaFi	Mathematics		1 or 2	first or second							
Vrsta predmeta / Course type	izbirni										
Univerzitetna koda predmeta / University course code:	M3136										
Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS					
30					150	6					
Nosilec predmeta / Lecturer:	doc. Damjan Kobal										
Jeziki / Languages:	Predavanja / Lectures:	slovenski/Slovene, angleški/English									
	Vaje / Tutorial:	slovenski/Slovene, angleški/English									
Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites:										
Vsebina:	Content (Syllabus outline):										

<p>V odvisnosti od interesov in usmerjenosti študentov bo izvajalec izbral in kombiniral med temami:</p> <p>Teorije učenja:</p> <p>Behavioristične, kognitivne, konstruktivistične, interakcijske teorije učenja, Koncept matematičnega znanja, cilji poučevanja matematike, učenje matematike in procesiranje informacij, brunerjeva teorija reprezentacij, klasične in sodobne teorije reševanja matematičnih problemov, šolska praksa.</p> <p>Motivacija v razredu:</p> <p>Zanimivi naslovi popularizacije matematike, matematika v računalništvu, matematika v tehnologiji, matematika v avtomobilizmu, matematika moderne digitalne zvočne tehnike, matematika v biologiji, matematika v medicini ...</p> <p>Izobraževalna orodja s področja IKT:</p> <p>Računalnik pri pouku matematike, prosojnice, latex, risanje v latexu, spleť, interaktivna spletna orodja, orodja za simbolno računanje, orodja za dinamično geometrijo, interaktivna tabla.</p> <p>Matematične vsebine z IKT:</p> <p>Primeri obdelave poglavji klasične geometrije s programi za dinamično geometrijo: geometrija kroga in trikotnika, klasični izreki: Simson, Feuerbach, Cantor, Morley, Napoleon, Apollonius, Inversion, Möbius transformations.</p>	<p>Depending on the focus and interest of students the course will follow the following chapters:</p> <p>Theories of Learning:</p> <p>Behavioristic, cognitive, constructivistic, interactivistic theories of learning. The concept of mathematical knowledge. The goals of mathematics teaching. Learning of mathematics and informations management. Bruner's theory of representations. Classical and modern theories of solving of mathematical problems. Classroom practice.</p> <p>Classroom motivation:</p> <p>Interesting titles in the popularization of mathematics, Mathematics and Computer Sciences, Mathematics and Technology, Mathematics in Automotive Technology, Mathematics and Digital Sound Technology, Mathematics in Biology, Mathematics in Medicine, ...</p> <p>Learning Technologies:</p> <p>The use of Computer in Mathematics Classroom, Slides, Latex, Drawing in Latex, Internet, Interactive Web Tools, Tools for Symbolic Calculations, Dynamic Geometry Programs, Interactive Board.</p> <p>Mathematical content with a computer:</p> <p>Chapters in Classical Geometry with Dynamic Geometry Programs. The Geometry of Circle and Triangle. Classical Theorems: Simson, Feuerbach, Cantor, Morley, Napoleon, Apollonius, Inversion, Möbius transformations.</p>

Cilji in kompetence:

Namen predmeta je seznaniti študente s teoretičnimi in praktičnimi vidiki teorij učenja matematike. Predmet je usmerjen v spoznavanje temeljnih izobraževalnih teorij s posebno referenco na poučevanje matematike in praktičnim prikazom tako metod, sodobnih pripomočkov pri poučevanju kot tudi raznolikih matematičnih idej.

Objectives and competences:

The main purpose of the subject is to provide students with the theoretical and practical background of the modern theories of learning and trends in mathematics teaching. The emphasis is given to practical mathematics teaching issues which relate to new methods, to new learning technologies and to diverse ideas of relevant mathematical contents.

Predvideni študijski rezultati:

Znanje in razumevanje predstavljenih konceptov. Sposobnost uporabe pridobljenega znanja in spretnosti.

Intended learning outcomes:

Knowledge and comprehension of presented concepts. Ability to use acquired knowledge and skills.

Metode poučevanja in učenja:

Predavanja, konzultacije, reševanje problemov

Learning and teaching methods:

Lectures, consultations, problem sessions

Načini ocenjevanja:

Delež (v %) /

Weight (in %) **Assessment:**

Pisni izpit (domače naloge), ustni izpit		Written exam (homeworks), oral exam
	100 %
