

UČNI NAČRT PREDMETA / COURSE SYLLABUS						
Predmet:		Raziskovalno delo 1				
Course title:		Research 1				
Študijski program in stopnja Study programme and level		Študijska smer Study field		Letnik Academic year	Semester Semester	
3MaFi		Matematika		1	prvi in drugi	
3MaFi		Mathematics		1	first and second	
Vrsta predmeta / Course type				obvezni		
Univerzitetna koda predmeta / University course code:				M3128		
Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS
					720	24
Nosilec predmeta / Lecturer:		prof. Emil Žagar, prof. Franc Forstnerič, prof. Primož Potočnik				
Jeziki / Languages:	Predavanja / Lectures:	slovenski/Slovene, angleški/English				
	Vaje / Tutorial:	slovenski/Slovene, angleški/English				
Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:				Prerequisites:		
Vsebina:				Content (Syllabus outline):		

<p>Študent se posveti jedru doktorskega študija, raziskovalnemu delu. Temeljito preuči vsebine, ki so tesno povezane z njegovim raziskovalnim delom, razišče pristope za reševanje zastavljenega problema in postavi osnovne domneve. Z raziskovanjem posebnih primerov počasi pridobiva znanje za kar se da splošno rešitev problema doktorske disertacije. Pripravi in temeljito izdela članke, v katerih predstavi rešitev problema. Članke pošlje v evalvacijo za objavo v uglednih znanstvenih revijah s področja, na katerem raziskovalno dela. V okviru predmeta se študenti lahko udeležijo strokovnih srečanj.</p>	<p>The student starts his research on the main topic of PhD studies. He studies the relevant literature in detail. He considers several approaches to the solution of the proposed problem and states basic conjectures. In order to obtain as general a solution of the problem as possible, he considers some special cases. Finally, he thoroughly prepares manuscripts involving solutions of the problem and submits them for evaluation to relevant international journals. Within the course students can attend professional meetings.</p>
---	--

Temeljni literatura in viri / Readings:

<p>Izbira temeljne literature je pomemben del raziskovalnega dela. Študent jo izbere sam z morebitnimi nasveti mentorja.</p> <p>How to chose relevant literature is an important part of the research work. A student should be able to chose it alone with some possible suggestions of the supervisor.</p>
--

Cilji in kompetence:

<p>Študent reši zastavljeni problem doktorske disertacije in ga pripravi v obliki, ki je primerna za objavo v znanstveni reviji.</p>
--

Objectives and competences:

<p>The student solves a proposed problem of doctoral thesis and prepares a relevant manuscript.</p>

Predvideni študijski rezultati:

<p>Študent je, potem ko opravi predmet, sposoben samostojno nadaljevati raziskave na področju doktorske disertacije ali širše.</p>
--

Intended learning outcomes:

<p>After the course is completed, a student is able to continue a research either on the field of doctoral thesis or wider.</p>

Metode poučevanja in učenja:

Samostojni študij in konzultacije.

Learning and teaching methods:

Individual study and consultations.

Načini ocenjevanja:

Ocene: opravil, ni opravil

Delež (v %) /

Weight (in %)

Assessment:

Grades: pass, fail.

100%
