

UČNI NAČRT PREDMETA / COURSE SYLLABUS (leto / year 2017/18)									
Predmet:	Diskretne strukture 1								
Course title:	Discrete structures 1								
Študijski program in stopnja Study programme and level	Študijska smer Study field		Letnik Academic year	Semester Semester					
Interdisciplinarni univerzitetni študijski program Računalništvo in matematika	ni smeri		1	prvi					
Interdisciplinary first cycle academic study programme Computer Science and Mathematics	none		1	first					
Vrsta predmeta / Course type	obvezni / compulsory								
Univerzitetna koda predmeta / University course code:	27202								
Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS			
45		45			90	6			
Nosilec predmeta / Lecturer:	prof. dr. Primož Potočnik, prof. dr. Riste Škrekovski								
Jeziki / Languages:	Predavanja / Lectures: slovenski / Slovene								
	Vaje / Tutorial: slovenski / Slovene								
Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites:								
Vpis v letnik študija.	Enrolment in the programme.								
Vsebina:	Content (Syllabus outline):								

Izjavni račun, predikatni račun.	Predicate logic, predicate calculus.
Množice in relacije.	Sets and relations.
Urejenosti in mreže.	Orders and lattices.
Funkcije in permutacije.	Functions and permutations.
Moč množic.	Cardinality of sets.
Teorija števil.	Number theory.

Temeljni literatura in viri / Readings:

- Riste Škrekovski: Diskrete strukture I [Elektronski vir] : zapiski predavanj, <http://www.fmf.uni-lj.si/skreko/Gradiva/DS1-skripta.pdf>, ISBN 978-961-92887-2-6, 88 str.

- Vladimir Batagelj: Diskrete strukture – množice, samozaložba, Ljubljana 1998, 40.
- Vladimir Batagelj in Sandi Klavžar: DS1 – Logika in množice: naloge, Društvo matematikov, fizikov in astronomov Slovenije, Ljubljana 2000, ISBN: 961-212-039-0, 126 str.

Cilji in kompetence:

Diskrete strukture predstavljajo osnovo računalniške znanosti, saj je delovno poznvanje osnovnih konceptov diskretnih struktur potrebno na skoraj vseh področjih računalništva. Pri Diskretnih strukturah I študent spozna osnovne pojme logike, teorije množic, teorije števil.

Objectives and competences:

Discrete structures are the basis of computer science, because it is a working knowledge of the basic concepts of discrete structures needed in almost all areas of computing. In Discrete Structures I, the student learns the basic concepts of logic, set theory, number theory.

Predvideni študijski rezultati:

Intended learning outcomes:

Znanje in razumevanje: Študentje spoznajo: osnove logike, osnove teorije množic, osnove relacijskega računa, osnovne pojme teorije števil.

Uporaba: Študentje znajo: logično sklepati s pomočjo naravne dedukcije, ugotavljati lastnosti relacij in struktur urejenosti, reševati linearne diofantske enačbe z dvema neznankama, računati s kongruencami.

Refleksija: Študentje spoznajo razliko med zvezno in diskretno matematiko.

Prenosljive spretnosti - niso vezane le na en predmet: uporaba matematične logike za analizo sklepanja, modeliranje odnosov v realnem svetu z relacijami in mrežami.

Knowledge and understanding: Students learn about: fundamentals of logic, set theory basics, basics of calculus queries, the basic concepts of the theory of numbers.

Application: Students know: a logical conclusion with the help of deduction, to determine the properties of relations and the structures of orders, solve linear Diophantine equations with two unknowns, to reckon with congruity.

Reflection: Students learn the difference between continuous and discrete mathematics.

Transferable skills: the use of mathematical logic for the analysis of reasoning, modeling relationships in the real world of relationships and networks.

Metode poučevanja in učenja:

Predavanja in vaje, domače naloge.

Learning and teaching methods:

Lectures and tutorial sessions, homework.

Načini ocenjevanja:

Delež (v %) /

Weight (in %)

Assessment:

2 kolokvija namesto izpita iz vaj, izpit iz vaj,

ustni izpit / izpit iz teorije.

6-10 (pozitivno), in 1-5 (negativno) (po Statutu UL).

50 %

50 %

2 midterm exams instead of written exam, written exam,

oral exam / theoretical test.

6-10 (pass), 1-5 (fail) (according to the Statute of UL)
