

UČNI NAČRT PREDMETA / COURSE SYLLABUS (leto / year 2017/18)								
Predmet:	Linearna algebra							
Course title:	Linear algebra							
Študijski program in stopnja Study programme and level	Študijska smer Study field			Letnik Academic year	Semester Semester			
Visokošolski strokovni študijski program Praktična matematika	ni smeri			1	prvi in drugi			
First cycle professional study programme Practical Mathematics	none			1	first and second			
Vrsta predmeta / Course type	obvezni / compulsory							
Univerzitetna koda predmeta / University course code:	M0445							
Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS		
90		90			210	13		
Nosilec predmeta / Lecturer:	prof. dr. Tomaž Košir, prof. dr. Boris Lavrič							
Jeziki / Languages:	Predavanja / Lectures: slovenski / Slovene  Vaje / Tutorial: slovenski / Slovene							
Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites:							
Vpis v letnik študija.	Enrolment in the programme.							
Vsebina:	Content (Syllabus outline):							

Vektorji v ravnini in trirazsežnem prostoru.	Plane vectors and three-dimensional space vectors.
Skalarni produkt, vektorski produkt, mešani produkt.	Dot product, cross product, box product.
Premice in ravnine, razdalje med točkami, premicami in ravninami.	Lines and planes, distances between points, lines and planes.
Matrike, algebraične operacije z matrikami.	Matrices, algebraic operations with matrices.
Elementarne transformacije, vrstična kanonična forma.	Elementary transformations, row echelon form.
Sistemi linearnih enačb, Gaussova eliminacija.	Systems of linear equations, Gauss elimination.
Determinanta.	Determinant.
Prirejenka in inverz matrike, Cramerjevo pravilo.	Classical adjoint and inverse of a matrix, Cramer's rule.
Realni in kompleksni vektorski prostori.	Real and complex vector spaces.
Linearna neodvisnost, baza in dimenzija.	Linear independency, basis and dimension.
Linearne preslikave.	Linear transformations.
Matrike linearnih preslikav.	Matrices of linear transformations.
Rang in prehod na novo bazo.	Rank and change of basis.
Karakteristični polinom, lastne vrednosti, lastni vektorji.	Characteristic polynomial, eigenvalues, eigenvectors.
Cayley-Hamiltonov izrek, minimalni polinom. Diagonalizacija, Schurov izrek.	Cayley-Hamilton theorem, minimal polynomial. Diagonalization, Schur theorem.
Spektralni razcep, funkcije matrik.	Spectral decomposition , functions of matrices.
Vektorski prostor s skalarnim produktom. Ortonormirana baza, Gram-Schmidtova ortogonalizacija.	Scalar product vector spaces. Orthonormal basis, Gram-Schmidt orthogonalization.
Linearni funkcionali, adjungirana preslikava.	Linear functionals, adjoint transformation.
Sebi-adjungirane preslikave, simetrične in hermitske matrike.	Self-adjoint transformations, symmetric and hermitian matrices.

Normalne, ortogonalne in unitarne matrike.	Normal, orthogonal and unitary matrices.
Pozitivno definitne matrike.	Positive definite matrices.
Kvadratne forme, Sylvestrov izrek.	Quadratic forms, Sylvester theorem.
Krivulje in ploskve drugega reda.	Second order curves and surfaces.

#### **Temeljni literatura in viri / Readings:**

- J. Grasselli, A. Vadnal: Linearna algebra, linearno programiranje, DMFA založništvo, Ljubljana, 1986.
- T. Košir: Zapiski s predavanj iz Linearne algebре (spletna učilnica)
- E. Kramar: Rešene naloge iz linearne algebре, DMFA založništvo, Ljubljana, 1994.
- S. I. Grossman: Elementary linear algebra with applications, McGraw-Hill, 1994.
- D. C. Lay: Linear algebra and its applications, Reading: Addison-Wesley, 1994.
- The linear algebra problem solver : a complete solution guide to any textbook. Piscataway: Research and Education Association, 1993.

#### **Cilji in kompetence:**

Študentje spoznajo osnovne pojme iz linearne algebре, potrebne pri nadalnjem študiju: osnove dvo- in tro-razsežne evklidske geometrije, matrično algebro, reševanje sistemov linearnih enačb, računanje s polinomi in osnovne elemente abstraktne algebре. Naučijo se matematičnega načina razmišljanja in pridobijo praktično in delovno znanje s področja linearne algebре.

#### **Objectives and competences:**

Students get familiar with the basic concepts of linear algebra, necessary for further study: basics of two and three-dimensional euclidean geometry, matrix algebra, solving systems of linear equations, calculating with polynomials and basic elements of abstract algebra. They learn a mathematical way of thinking and achieve practical and working knowledge from the field of linear algebra.

#### **Predvideni študijski rezultati:**

Znanje in razumevanje:

Poznavanje in razumevanje osnovnih pojmov in postopkov linearne algebре. Uporaba pridobljenega znanja.

#### **Intended learning outcomes:**

Knowledge and understanding:

Knowledge and understanding of the basic concepts and methods of linear algebra. Application of the achieved knowledge.

<p><b>Uporaba:</b></p> <p>Linearna algebra sodi med temeljne predmete pri študiju naravoslovja, tehnike, družboslovja in večine drugih področij znanosti.</p> <p><b>Refleksija:</b></p> <p>Povezovanje teoretičnih in praktičnih postopkov za reševanje osnovnih uporabnih problemov.</p> <p><b>Prenosljive spretnosti – niso vezane le na en predmet:</b></p> <p>Matematično korektna formulacija problemov, izbira primernih metod, zmožnost natančnega reševanja problemov ter analize dobljenih rezultatov.</p>	<p><b>Application:</b></p> <p>Linear algebra is one of the fundamental subjects in the study of natural, technical, social and almost all other science fields.</p> <p><b>Reflection:</b></p> <p>Integrating theoretical and practical procedures for solving basic practical problems.</p> <p><b>Transferable skills:</b></p> <p>Mathematically correct formulation of problems, the choice of appropriate methods, capability of accurate solving of problems and analysis of obtained results.</p>
---	---

<b>Metode poučevanja in učenja:</b>	<b>Learning and teaching methods:</b>
predavanja, vaje, domače naloge, konzultacije	Lectures, exercises, homeworks, consultations

<b>Načini ocenjevanja:</b>	<b>Delež (v %) / Weight (in %)</b>	<b>Assessment:</b>
Način (pisni izpit, ustno izpraševanje, naloge): izpit iz vaj (4 kolokviji ali pisni izpit) ustni izpit Ocene: 1-5 (negativno), 6-10 (pozitivno) (po Statutu UL)	50% 50%	Type (examination, oral, coursework): 4 midterm exams instead of written exam, written exam oral exam Grading: 1-5 (fail), 6-10 (pass) (according to the Statute of UL)
