

UČNI NAČRT PREDMETA / COURSE SYLLABUS (leto / year 2016/17)						
Predmet:		Teorija operatorjev				
Course title:		Operator theory				
Študijski program in stopnja Study programme and level		Študijska smer Study field		Letnik Academic year		Semester Semester
Magistrski študijski program Finančna matematika		ni smeri		1 ali 2		prvi ali drugi
Master's study programme Financial Mathematics		none		1 or 2		first or second
Vrsta predmeta / Course type				izbirni / elective		
Univerzitetna koda predmeta / University course code:				M2123		
Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS
45		30			105	6
Nosilec predmeta / Lecturer:				prof. dr. Roman Drnovšek, prof. dr. Peter Šemrl		
Jeziki / Languages:		Predavanja / Lectures: slovenski / Slovene, angleški / English				
		Vaje / Tutorial: slovenski / Slovene, angleški / English				
Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:				Prerequisites:		
Vpis v letnik študija.				Enrolment in the programme.		
Vsebina:				Content (Syllabus outline):		

<p>Kompaktni operatorji na Banachovih prostorih.</p> <p>Schauderjev izrek o negibni točki.</p> <p>Invariantni podprostor. Izrek Lomonosova. Rieszov razcep kompaktnega operatorja.</p> <p>Fredholmovi operatorji. Calkinova algebra. Bistveni spekter.</p> <p>Parcialne izometrije in unitarni operatorji.</p> <p>Schmidtova reprezentacija kompaktnih operatorjev.</p> <p>Hilbert-Schmidtovi operatorji. Dualnost med algebrami vseh omejenih operatorjev, vseh operatorjev s sledjo in vseh kompaktnih operatorjev.</p> <p>Spekter normalnih operatorjev.</p> <p>Spektralni izrek za normalne operatorje (v obliki operatorja množenja in v integralski obliki).</p> <p>Fuglede-Putnamov izrek.</p>	<p>Compact operators on Banach spaces. The Schauder fixed point theorem.</p> <p>Invariant subspaces. Lomonosov's theorem. The Riesz decomposition of a compact operator. Fredholm operators. The Calkin algebra. The essential spectrum. Partial isometries and unitary operators. The Schmidt representation of a compact operator. Hilbert-Schmidt operators. Duality between the algebra of all bounded operators, the algebra of all trace-class operators and the algebra of all compact operators. The spectrum of normal operators. The spectral theorem for normal operators (in the multiplication operator form and in the integral form).</p> <p>The Fuglede-Putnam theorem.</p>

Temeljna literatura in viri / Readings:

- R. Bhatia: Notes on Functional Analysis, Texts and Readings in Mathematics 50, Hindustan Book Agency, New Delhi, 2009.
- J. B. Conway: A Course in Functional Analysis, 2nd edition, Springer, New York, 1990.
- I. Gohberg, S. Goldberg, M. A. Kaashoek: Classes of Linear Operators I, Birkhäuser, Basel, 1990.
- G. K. Pedersen: Analysis Now, Springer, New York, 1996.
- I. Vidav: Linearni operatorji v Banachovih prostorih, DMFA-založništvo, Ljubljana, 1982.

Cilji in kompetence:

Objectives and competences:

Obravnavo nekaterih razredov omejenih linearnih operatorjev na Hilbertovih in Banachovih prostorih.

Treatment of some classes of bounded linear operators on Hilbert and Banach spaces.

Predvideni študijski rezultati:

Znanje in razumevanje: Poznavanje osnovnih razredov linearnih operatorjev, sposobnost aplikacije pridobljenega znanja.

Uporaba: Uporaba teorije operatorjev sega tudi v naravoslovje in druga področja znanosti kot na primer ekonomijo.

Refleksija: Razumevanje teorije, utrjeno s primeri uporabe.

Prenosljive spretnosti – niso vezane le na en predmet: Identifikacija in reševanje problemov. Spretnost uporabe domače in tuje literature.

Intended learning outcomes:

Knowledge and understanding: Knowledge of some classes of linear operators, the ability to apply the acquired knowledge.

Application: Operator theory is used in natural sciences and other areas of science such as economics.

Reflection: Understanding of the theory, strengthened by examples.

Transferable skills: Identifying and solving problems. Ability to use a wide range of references.

Metode poučevanja in učenja:

predavanja, vaje, domače naloge, konzultacije

Learning and teaching methods:

Lectures, exercises, homeworks, consultations

Načini ocenjevanja:

Delež (v %) /
Weight (in %)

Assessment:

Način (pisni izpit, ustno izpraševanje, naloge, projekt):	Delež (v %) / Weight (in %)	Assessment:
domače naloge	10%	Type (examination, oral, coursework, project):
izpit iz vaj	50%	homeworks
ustni izpit	40%	written exam
		oral exam

Ocene: 1-5 (negativno), 6-10 (pozitivno) (po Statutu UL)		Grading: 1-5 (fail), 6-10 (pass) (according to the Statute of UL)
