

UČNI NAČRT PREDMETA / COURSE SYLLABUS									
Predmet:	Izbrana poglavja iz finančne matematike 1								
Course title:	Topics in financial mathematics 1								
Študijski program in stopnja Study programme and level	Študijska smer Study field		Letnik Academic year	Semester Semester					
Magistrski študijski program Matematika	ni smeri		1 ali 2	prvi ali drugi					
Master's study programme Mathematics	none		1 or 2	first or second					
Vrsta predmeta / Course type	izbirni								
Univerzitetna koda predmeta / University course code:	M2522								
Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje work	Druge oblike študija	Samost. delo Individ. work	ECTS			
30	15	30			105	6			
Nosilec predmeta / Lecturer:	prof. Tomaž Košir								
Jeziki / Languages:	Predavanja / slovenski/Slovene, angleški/English Lectures:								
	Vaje / Tutorial: slovenski/Slovene, angleški/English								
Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites:								
Vsebina:	Content (Syllabus outline):								
Predavatelj izbira med naslednjimi pa tudi drugimi aktualnimi področji finančne matematike:	Lecturer can choose amon the following and some other current topics in financial mathematics: Credit risk models: basic definitions, basic								

<p>Modeli za kreditno tveganje: osnovne definicije, osnovni modeli, vrednotenje izvedenih vrednostnih papirjev vezanih na kreditno tveganje.</p> <p>Upravljanje s tveganjem: mere tveganja, koherenca, dinamične mere tveganja, modeli s kopulami, teorija ekstremnih vrednosti, optimalne strategije, modeli za obvladovanje tveganja.</p>	<p>models, pricing of credit derivatives.</p> <p>Risk management: risk measures, coherence, dynamic risk measures, copula models, extreme value theory, optimal strategies, risk management models.</p>

Cilji in kompetence:

Predmet pokriva poglavja iz matematičnih finanč, pri katerih se prepleta ekonomsko razmišljanje z zapletenimi matematičnimi orodji. Nekatera poglavja so nadgradnja prejšnjih z dodatnimi interpretacijami, nekatera pa so pomemben del razmišljanja o tveganju.

Zaradi neposredne uporabnosti vsebin bodo pri predmetu sodelovali tudi strokovnjaki iz prakse.

Objectives and competences:

The course covers topics in mathematical finance in which economic reasoning is combined with advanced mathematical tools. Some of them are based on previous courses and give additional interpretation, some contribute to understanding of the risks.

Since the content is of great practical importance we expect that also specialists from financial practice will present their work experience during the course.

Predvideni študijski rezultati:

Intended learning outcomes:

<p>Znanje in razumevanje: Razumevanje matematičnih modelov, ki se uporABLjajo v matematičnih financah in sredstev za njihovo obravnavo.</p> <p>Uporaba: Pridobljeno znanje je po eni strani neposredno prenosljivo, po drugi strani pa je izhodišče za kobiliranje matematičnega znanja z ekonomskimi vsebinami.</p> <p>Refleksija: Področje, in s tem posledično predmet, združuje številne znanja iz matematike od linearne algebri do parcialnih diferencialnih enačb.</p> <p>Prenosljive spretnosti – niso vezane le na en predmet: Pridobljeno znanje je neposredno uporabno v finančnih ustanovah kot so banke in zavarovalnice. Vsebina predmeta tudi pomaga izostritvi sposobnosti matematičnega modeliranja.</p>	<p>Knowledge and understanding: Understanding of mathematical models used in mathematical finance and the mathematical tools used in solutions.</p> <p>Application: The knowledge and skills acquired are directly transferable and can also serve for combining mathematical reasoning with economic topics.</p> <p>Reflection: The subject of the course, hence the course itself, combines numerous mathematical skills starting from linear algebra to partial differential equations.</p> <p>Transferable skills: The knowledge and skills acquired are immediately applicable in financial institutions such as banks and insurance companies. The content also serves to deepen the ability to use mathematical models.</p>

Metode poučevanja in učenja: predavanja, vaje, konzultacije, seminarske naloge	Learning and teaching methods: Lectures, exercises, consultations, seminars
Načini ocenjevanja: Način (pisni izpit, ustno izpraševanje, naloge, projekt):	Delež (v %) / Weight (in %) Assessment: 50% Type (examination, oral, coursework, project):

samostojna seminarska naloga opravljena seminarska naloga za pristop k teoretičnemu delu izpita Ocene: 1-5 (negativno), 6-10 (pozitivno) (po Statutu UL)	50%	individual seminar completed seminar work is required for the exam on the course content Grading: 1-5 (fail), 6-10 (pass) (according to the Statute of UL)
