

UČNI NAČRT PREDMETA / COURSE SYLLABUS (leto / year 2017/18)						
<b>Predmet:</b>		Uvod v programiranje				
<b>Course title:</b>		Introduction to programming				
<b>Študijski program in stopnja</b> Study programme and level		<b>Študijska smer</b> Study field		<b>Letnik</b> Academic year	<b>Semester</b> Semester	
Enoviti magistrski študijski program Pedagoška matematika		ni smeri		1	drugi	
Integrated Master's study programme Pedagogical Mathematics		none		1	second	
<b>Vrsta predmeta / Course type</b>				obvezni / compulsory		
<b>Univerzitetna koda predmeta / University course code:</b>				M0504		
<b>Predavanja</b> Lectures	<b>Seminar</b> Seminar	<b>Vaje</b> Tutorial	<b>Klinične vaje</b> work	<b>Druge oblike študija</b>	<b>Samost. delo</b> Individ. work	<b>ECTS</b>
30		45			105	6
<b>Nosilec predmeta / Lecturer:</b>		prof. dr. Andrej Bauer, prof. dr. Marko Petkovšek				
<b>Jeziki / Languages:</b>		<b>Predavanja / Lectures:</b>		slovenski / Slovene		
		<b>Vaje / Tutorial:</b>		slovenski / Slovene		
<b>Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:</b>				<b>Prerequisites:</b>		
Vpis v letnik študija.				Enrolment in the programme.		
Opravljen predmet Računalniški praktikum.				Completed course Computer practical.		
<b>Vsebina:</b>				<b>Content (Syllabus outline):</b>		

<p>Pojem algoritma. Osnovni koncepti v programiranju: spremenljivke, osnovni in številski tipi, aritmetika, pogojni stavki in Boolove vrednosti, zanke, tabele, datoteke, podprogrami.</p> <p>Uvod v strukturirano programiranje: funkcijsko programiranje (funkcije, funkcije višjih redov, rekurzivne funkcije, paralelizacija), podatkovni tipi (uporabniški podatkovni tipi, skladi, vrste, sezname, drevesa), objektno programiranje.</p>	<p>The concept of algorithm. Basic programming concepts: variables, basic and numeric types, arithmetic, conditional statements and Boolean values, loops, arrays, files, subroutines.</p> <p>Introduction to structured programming: functional programming (functions, higher-order functions, recursive functions, parallelization), data types (user-defined data types, stack, queue, list, tree), object-oriented programming.</p>
--	--

**Temeljni literatura in viri / Readings:**

<p>Priročniki in učbeniki za programske jezike, ki jih študenti spoznajo.</p> <p>Manuals and textbooks for programming languages that students learn.</p>
---

**Cilji in kompetence:**

<p>Študent spozna osnovne tehnike programiranja.</p>
--

**Objectives and competences:**

<p>Student learns the basic programming techniques.</p>
---

**Predvideni študijski rezultati:**

<p>Znanje in razumevanje: Znanje iz osnov programiranja.</p> <p>Uporaba: Reševanje matematičnih in drugih problemov z računalnikom, predvsem kadar je treba za rešitev problema sestaviti preprost program.</p> <p>Refleksija: Sposobnost programiranja omogoča uporabniku višji nivo nadzora nad računalnikom in mu omogoča reševanje problemov, ki jih z običajnimi aplikacijami ne more rešiti.</p>
--

**Intended learning outcomes:**

<p>Knowledge and understanding: Knowledge of basic programming.</p> <p>Application: Solving mathematical and other problems with a computer, in particular when a simple computer program is required for this task.</p> <p>Reflection: The ability of programming enables a higher lever of control over the computer and enables the student to solve the problems that cannot be solved using the standard</p>
---

Prenosljive spretnosti – niso vezane le na en predmet: Programerske sposobnosti študent uporabi pri ostalih računalniških in numeričnih predmetih.

applications.  
Transferable skills: The skill of programming is required in other computer and numerical courses.

**Metode poučevanja in učenja:**

Predavanja, vaje, domače naloge, konzultacije

**Learning and teaching methods:**

Lectures, exercises, homework, consultations

<b>Načini ocenjevanja:</b>	Delež (v %) / Weight (in %)	<b>Assessment:</b>
Možna sta dva načina ali kombinacija obeh po odločitvi izvajalca:	50%	Two approaches are possible or a combination of both (teacher's decision):
1. način (sprotno ustno izpraševanje na vajah, končni ustni izpit):	50%	
Študent na vsakih vajah odda izdelek. Asistent ga pregleda in na naslednjih vajah študenta še na osnovi izdelka ustno izpraša ter oceni. Na osnovi ocen iz vaj se določi končna ocena iz vaj. Zahteva se vsaj 85% prisotnost na vajah.	50%	Approach 1: (oral examination during exercises, final oral exam)
Izpit iz teorije	50%	
2. način (pisni izpit, ustno izpraševanje, naloge, projekt):	50%	The student submits the result of his/her work after each exercise (lab) session. Teaching assistant reviews the work, examines (orally) the student during the next exercise session and grades him/her. The final grade is determined from the grades of each exercise. The required presence at the exercise sessions is 85%
2 kolokvija namesto izpita iz vaj, izpit iz vaj, opsijski manjši projekt (seminarska naloga)		(final) oral exam
izpit iz teorije.		Approach 2: (examination, oral, coursework, project):
Splošno:		2 midterm exams instead of written exam, written exam
ocene: 1-5 (negativno), 6-10 (pozitivno)		oral exam General:

(po Statutu UL)		grading: 1-5 (fail), 6-10 (pass) (according to the Statute of UL)
